For: FIELD LOAD TESTER FOR ELECTRIC WATT HOUR METER

AMENDMENT

Honorable Commissioner of Patents and Trademarks  
Washington, D.C. 20231

Dear Sir:

In response to the Official Action mailed May 9, 2000, please amend the above patent application as follows:

THE TITLE:

The Examiner determined that the title of the present invention is not descriptive and requires a new title. Please amend the title to read:

PORTABLE TESTER FOR WATT HOUR METER

IN THE DRAWINGS:

The labeling of "element 62" was inadvertently overlooked. Please amend FIG. 3 and FIG. 6 to include the numeral 62 as shown in the accompanying corrected FIG. 3 and FIG. 6. A description of element 62 may be found in the Detailed Description of the Presently Preferred Embodiment (page 4, lines 25-28).

The labeling of the light located in cover 22 was also inadvertently overlooked in FIG. 2. Please amend FIG. 2 to include the numeral 21 as shown in the accompanying corrected FIG. 2. Please add the numeral 21 to the right-most end of line 34 of page 4 behind the word "light" and after the word "light" on lines 36 and 40 of page 4. Also, please delete the word "a" before the word "light" on line 35 of page 4, add the numeral 21 behind that same word "light," and replace the words "not depicted" in the parenthetical following that word "light" with the words "see FIG. 2". Line 35, page 4 should then read: "First light wire 80 and second light wire 84 feed to light 21 (see FIG. 2) in cover 22."
